TANZANIA

QUICKSIGHTS REPORT
FOURTH ANNUAL FII TRACKER SURVEY
Fieldwork conducted August-September 2016

November 2016
Key definitions

Access to financial accounts – Access to a bank, mobile money or NBFI account means a respondent can use any of these services via their own account or the account of another person.

Active account holder – An individual who has a registered account and has used it in the last 90 days.

Advanced use of DFS – Advanced use of digital financial services includes activities beyond basic cash-in/cash-out and person-to-person transfers (e.g., savings, bill pay, investment, insurance).

Adults with DFS access – Adults (15+) who either own a DFS account or have access to someone else’s account.

Below the poverty line – In this particular study, adults living on less than $2.50 per day, as classified by the Progress out of Poverty Index published by the Grameen Foundation.

Cooperative – Typically, a business or other professional organization that is owned and run jointly by its members, who share the profits or benefits. Cooperatives can release some of the profits/funds as loans to its members.

Credit-only nonbank financial institutions – Nonbank financial institutions that only disburse loans to their customers.

Digital financial services (DFS) – Financial services provided through an electronic platform (mobile phones, electronic cards, the internet, etc.).

Financial inclusion – Included individuals are those who have an account with an institution that provides a full suite of financial services and comes under some form of government regulation. Services include savings, money transfers, insurance or investment. Institutions that only offer loans to consumers, such as some MFIs, are not considered to be full-service institutions.

Full-service nonbank financial institutions – Nonbank financial institutions that offer their customers at least one of the following services: savings, money transfers, insurance, or investment.

Grameen Progress out of Poverty Index (PPI) – A poverty measurement tool from the Grameen Foundation wherein a set of country-specific survey questions are used to compute the likelihood that a household is living above or below a poverty line.

Microfinance deposit-taking institutions (MDIs) – Financial services for poor and low-income clients offered by different types of service providers.

Microfinance institution (MFI) – An organization that offers financial services to low income populations. Almost all give loans to their members, and many offer insurance, deposit and other services.

Mobile money (MM) – A service in which a mobile phone is used to access financial services.

Nonbank financial institution (NBFI) – A financial organization that is not formally licensed as a bank or a mobile money provider, but whose activities are regulated, at least to some extent, by the central bank within the country. Such financial institutions include microfinance institutions (MFI), cooperatives, Post Office Banks and savings and credit cooperatives.

Post Office (Savings) Bank – A bank that offers savings and money transfers and has branches at local post offices.

Savings and credit cooperative (SACCO) – A unique member-driven, self-help group owned and managed by its members, who have a common bond. Its main purpose is to build up funds through regular contributions by each member, with the aim of providing affordable credit and collective investments for its members.

Unregistered/over-the-counter (OTC) user – An individual who has used DFS through someone else’s account, including a mobile money agent’s account or the account of a family member or a neighbor.

Urban/rural – Urban and rural persons are defined according to their residence in urban or rural areas as prescribed by the national bureau of statistics.
Country context

Since 2008, the Bank of Tanzania (BOT) has created an enabling environment for the expansion of financial inclusion, and the number of Tanzanians with access to financial services was growing until this year. In 2016, vigorous enforcement of laws and regulations such as mandatory mobile phone specifications, know your customer requirements, and new excise and value-added taxes coincided with a decline in mobile money access and account ownership. Compared to 2015, the 2016 FII survey data showed declines in mobile phone ownership, the number of registered mobile money accounts, and the number of active mobile money accounts. While the share of the national population holding registered mobile money accounts decreased by eight percentage points, there was a nine percentage point increase in the use of mobile money services over the counter (OTC). The share of the national population that holds registered mobile money accounts and uses them actively is nevertheless significantly larger than in 2014.

Deactivation of SIM cards: The Tanzania Communications Regulatory Authority (TCRA) in July 2016 required mobile phone companies to deactivate all improperly registered SIM cards or face steep fines. The TCRA is requiring all consumers to register their SIM cards through a recognized agent, using their official identification documents. The government edict against improperly registered SIM cards includes SIMs that were being sold without registering a subscribers’ official identity documents, SIM cards sold to consumers without requiring them to fill out registration forms, pre-activated SIM cards, as well as a ban on allowing partially registered SIM cards to be activated and used in their networks.

Phone ownership: In June 2016 the TCRA placed a ban on counterfeit mobile phones and began to switch off all “fake” phones because they did not meet the equipment standards as laid out in the 2014 Electronic and Postal Communication Act (including the ability to identify and track phones). In June 2016, the BBC reported that, as of mid-June, 630,000 phones had been shut down, with over one million deactivations expected to take place. This affected phone access and ownership as indicated in this FII report.

Value-added tax (VAT) on financial transactions: In the 2016/2017 budget, the government of Tanzania imposed new taxes on all financial services to increase government revenue. These new taxes included an 18-percent VAT on bank fees and commissions, and a 10-percent consumer tax on sending and withdrawing money through mobile money transfers. Where the new taxes were passed through to consumers, registered account use became more expensive. The taxes may have caused the decline in active mobile money account usage among price-sensitive populations, especially among females, those in rural areas and the poor, who mainly perform small transactions, as well as an increase in OTC use.
Country context

- **Interoperability**: The Bank of Tanzania (BOT) established an enabling environment for interoperability between banks and mobile money operators. All four major mobile network operators (MNOs), Airtel, Tigo, Vodacom and Zantel became interoperable February 2016 (MNOs Halotel and SMART have not joined as of yet). Tanzania is the first country in the world to have full interoperability of mobile money services, allowing customers to conveniently transact across networks at no extra cost, keeping cash digital.

- **New financial inclusion target**: The National Financial Inclusion Framework (NFIF, 2014/2017) sets a new target for the country’s financially included population; the goal is to have 80 percent of Tanzanian adults using formal financial services by 2017. The target was increased after Tanzania achieved its original goal of 50 percent by 2016 earlier than expected. The increase in access to formal financial services has been driven by the use of mobile phones to access financial services.

- **Financial literacy campaign**: The National Financial Education Framework 2016-2020, established by the BOT, aims to provide communities with financial education programs to promote sound financial decision-making, and is targeted to rural residence, youth and the poor. Plans include community financial education awareness and training, including a financial education curriculum for students.
Notable statistics

• Fewer Tanzanians are financially included in 2016 (54 percent) vs. 2015 (62 percent), mostly due to a decline in account access and ownership, particularly a drop in mobile money account ownership.
  o In 2016, mobile money account ownership declined to 53 percent from 61 percent in 2015, with the most notable attrition from among rural, female and lower income groups. The decline in mobile money account ownership may reflect government regulations put in place in 2016 that include the deactivation of improperly registered SIM cards and the shutdown of counterfeit phones.
  o There was a decline in phone ownership, 62 percent (vs. 77% in 2015). The BBC reported that more than 600,000 counterfeit mobile phones were disconnected and off the market by June 2016.
  o Access to any financial service declined by one point from 63 percent in 2015 to 62 percent in 2016.
  o Fifty-four percent of Tanzanian adults now have a registered financial account (vs. 62% in 2015).
  o Mobile money services provider Vodacom M-Pesa and Zantel Ezy-Pesa saw a decrease in their market shares, while Tigo Pesa and Airtel Money each experienced an increase.
  o Nearly all (94 percent) Tanzanians know of at least one mobile money provider and 53 percent have a mobile money account.
  o Over-the-counter use of mobile money increased significantly from 5 percent in 2015 to 14 percent in 2016. This also may be attributed to the deactivation of illegal phones and improperly registered SIM cards, and rising cost of using mobile money accounts created by new taxes.
  o Despite the decline in financial account access and ownership, active mobile money and bank account holders are more engaged in advanced activities than they were in 2015.
  o NBFI account ownership increased to 3 percent vs. 1 percent in 2015, reflecting an increase in account registration with full-service and credit-only NBFIs.

• Bank account access remained low, but constant in 2016.
  o Access to bank accounts remained at 8 percent year-on-year, most likely due to the reported lack of points of service (POS) within close proximity of where people live. Most live more than five kilometers away from a bank POS.
  o Active bank account use among registered account holders increased by seven points, now at 72 percent vs. 65 percent in 2015.

*Financial inclusion is defined as individuals having an account with institutions offering financial services beyond credit. Overlap representing those who have multiple kinds of financial accounts is not shown.

At-a-glance: Mobile money still drives financial services use; declines are likely due to the deactivation of illegal phones and SIMs, and increased cost of financial services as new taxes are passed on to price-sensitive consumers.

TANZANIA

FII Tanzania Tracker Survey details

Survey Summary

• Annual, nationally representative survey (N=3,029) of Tanzanian adults aged 15+
• Face-to-face interviews lasting, on average, 107 minutes
• Fourth survey (Wave 4) conducted from August 1 to September 19, 2016
• Tracks trends and market developments in DFS based on the information gathered in the first survey, conducted in 2013, second survey conducted in 2014 and third survey conducted in 2015

Data Collection

• Basic demographics and poverty measurement (Grameen Progress Out of Poverty Index). A new set of questions from the Grameen Foundation was used compared with previous years.
• Access/use of mobile devices
• Access/use of mobile money
• Access/use of formal financial services (e.g., bank accounts)
• Access/use of semi-formal and informal financial services (e.g., MFI, SACCO, cooperatives, self-help groups)
• Financial literacy and preparedness
• General financial behaviors

Figures are weighted to reflect national census data demographics.

*Source: InterMedia Tanzania FII Tracker survey Wave 4 (N=3,029, 15+), August-September 2016.*
Fifty-four percent of Tanzanians are financially included; mobile money remains the main driver of financial inclusion

To be considered financially included, individuals must have accounts with institutions offering financial services beyond credit. Some banks and many NBFIs only offer credit services to their customers.

*Overlap representing those who have multiple kinds of financial accounts is not shown.

**Throughout this report, bank account holders have accounts at full-service institutions, unless otherwise noted.

Source: InterMedia Tanzania FII Tracker survey Wave 4 (N=3,029, 15+), August-September 2016.
Close to two-thirds of adults continue to have access to any financial service; NBFI account access increased by three percentage points vs. 2015

Access to financial services
(Shown: Percentage of Tanzania adults for each year)

- Any financial service: 2013 (50%), 2014 (60%), 2015 (63%), 2016 (63%)
- Mobile money: 2013 (48%), 2014 (44%), 2015 (63%), 2016 (61%)
- Bank: 2013 (11%), 2014 (24%), 2015 (8%), 2016 (8%)
- Nonbank financial institution: 2013 (5%), 2014 (1%), 2015 (4%)

Types of accounts are not mutually exclusive.

Source: InterMedia Tanzania FII Tracker surveys Wave 1 (N=2,997, 15+), November 2013-March 2014; Wave 2 (N=3,000, 15+), August-October 2014; Wave 3 (N=3,001, 15+), September-October 2015; Wave 4 (N=3,029, 15+), August-September 2016.
Overall, there was a decline across financial services providers caused by the decrease in registered mobile money accounts and the increase in OTC use.

**Registered financial service users**

(Shown: Percentage of Tanzania adults for each year)

- **Any financial service**
  - 2013 (N=2,997): 47%
  - 2014 (N=3,000): 50%
  - 2015 (N=3,001): 54%
  - 2016 (N=3,029): 62%

- **Mobile money**
  - 2013 (N=2,997): 1%
  - 2014 (N=3,000): 10%
  - 2015 (N=3,001): 38%
  - 2016 (N=3,029): 53%

- **Bank**
  - 2013 (N=2,997): 19%
  - 2014 (N=3,000): 7%
  - 2015 (N=3,001): 8%

- **Nonbank financial institution**
  - 2013 (N=2,997): 3%
  - 2014 (N=3,000): 1%

Types of accounts are not mutually exclusive.

Source: InterMedia Tanzania FII Tracker surveys Wave 1 (N=2,997, 15+), November 2013-March 2014; Wave 2 (N=3,000, 15+), August-October 2014; Wave 3 (N=3,001, 15+), September-October 2015; Wave 4 (N=3,029, 15+), August-September 2016.
The decline in active financial account usage was due to the decrease in active mobile money use; NBFI active usage increased vs. 2015

Active financial account holders
(Shown: Percentage of Tanzanian adults)

- Any financial service: 2013 (N=2,997) - 40%, 2014 (N=3,000) - 45%, 2015 (N=3,001) - 54%
- Mobile money: 2013 (N=2,997) - 38%, 2014 (N=3,000) - 40%, 2015 (N=3,001) - 53%
- Bank: 2013 (N=2,997) - 8%, 2014 (N=3,000) - 16%, 2015 (N=3,001) - 5%
- Nonbank financial institution: 2013 (N=2,997) - 0.9%, 2014 (N=3,000) - 2%

Active financial account holders
(Shown: Percentage of registered users for each type of account, by year)

- Any financial service: 2013 (N=2,997) - 86%, 2014 (N=3,000) - 90%, 2015 (N=3,001) - 87%
- Mobile money: 2013 (N=2,997) - 84%, 2014 (N=3,000) - 75%, 2015 (N=3,001) - 87%
- Bank: 2013 (N=2,997) - 74%, 2014 (N=3,000) - 65%, 2015 (N=3,001) - 72%
- Nonbank financial institution: 2013 (N=2,997) - 86%, 2014 (N=3,000) - 86%

Active bank account use has increased since 2015

Types of accounts are not mutually exclusive.

Source: InterMedia Tanzania FII Tracker surveys Wave 1 (N=2,997, 15+), November 2013-March 2014; Wave 2 (N=3,000, 15+), August-October 2014; Wave 3 (N=3,001, 15+), September-October 2015; Wave 4 (N=3,029, 15+), August-September 2016.
Those who retained mobile money accounts used advanced services more often; advanced use of bank and mobile money accounts increased vs. 2015

Due to the changes in the questionnaire some data points may not be directly comparable across years. Obtaining airtime through mobile money is no longer considered an advanced mobile money activity, but bank advanced use includes airtime top-ups.

Source: InterMedia Tanzania FII Tracker surveys Wave 1 (N=2,997, 15+), November 2013-March 2014; Wave 2 (N=3,000, 15+), August-October 2014; Wave 3 (N=3,001, 15+), September-October 2015; Wave 4 (N=3,029, 15+), August-September 2016.
Active account usage is higher among males, those living above the poverty line, and those in urban areas.

2016: Active account usage by demographic
(Shown: Percentage of each subgroup)

- Above poverty line (n=691)
  - Active bank account holders: 13%
  - Active mobile money account holders: 63%
  - Active NBFI account holders: 4%

  - All active financial account holders: 49%

- Total population (N=3,029)
  - Active bank account holders: 5%
  - Active mobile money account holders: 40%
  - Active NBFI account holders: 2%
  - All active financial account holders: 41%

- Females (n=1,818)
  - Active bank account holders: 3%
  - Active mobile money account holders: 33%
  - Active NBFI account holders: 2%
  - All active financial account holders: 33%

- Rural (n=2,027)
  - Active bank account holders: 3%
  - Active mobile money account holders: 29%
  - Active NBFI account holders: 2%
  - All active financial account holders: 30%

- Below poverty line (n=2,338)
  - Active bank account holders: 3%
  - Active mobile money account holders: 32%
  - Active NBFI account holders: 1%
  - All active financial account holders: 33%

Types of accounts are not mutually exclusive.

Source: InterMedia Tanzania FII Tracker survey Wave 4 (N=3,029, 15+), August-September 2016.
More than half of adults know of a mobile money agent within 1 kilometer of where they live; bank points of service are more than 5 kilometers away.

2016: Proximity to points-of-service (POS) for financial institutions
(Shown: Percentage of Tanzania adults, N=3,029)

63% of adults know of a mobile money (MM) agent within 1 km of their homes.

Close to half of adults do not know of any SACCO or MFI nearby.

*The Tanzanian government and NGOs are using microfinance institutions such as Village Community Banks (VOCOBA) to reach the unbanked and rural communities.

Source: InterMedia Tanzania FII Tracker survey Wave 4 (N=3,029 15+), August-September 2016.
Declines in readiness indicators were sharp for owning a phone and SIM card, texting capabilities, access to a phone and valid identification vs. previous years

### 2016: Key indicators of preparedness for digital financial services
(Shown: Percentage of Tanzanian adults, N=3,029)

Digital stored-value accounts: accounts in which a monetary value is represented in a digital electronic format and can be retrieved/transferred by the account owner remotely. For this particular study, DSVAs include a bank account or NBFI account with digital access (a card, online access or a mobile phone application) and a mobile money account.
