UGANDA

QUICKSIGHTS REPORT
FOURTH ANNUAL FII TRACKER SURVEY

Fieldwork conducted July - August 2016

November 2016
Key definitions

**Access to financial accounts** – Access to a bank account, mobile money account or an NBFI account means a respondent can use any of these services via their own account or the account of another person.

**Active account holder** – An individual who has a registered account and has used it in the last 90 days.

**Advanced use of DFS** – Advanced use of digital financial services includes activities beyond basic cash-in/cash-out and person-to-person transfers (e.g., savings, bill pay, investment, insurance).

**Adults with DFS access** – Adults (15+) who either own a DFS account or have access to someone else’s account.

**Below the poverty line** – In this particular study, adults living on less than $2.50 per day, as classified by the Grameen PPI.

**Cooperative** – Typically, a business or other professional organization that is owned and run jointly by its members, who share the profits or benefits. Cooperatives can release some of the profits/funds as loans to its members.

**Credit-only nonbank financial institutions** – Nonbank financial institutions that only disburse loans to their customers.

**Digital financial services (DFS)** – Financial services provided through an electronic platform (mobile phones, electronic cards, the internet, etc.).

**Financial inclusion** – Included individuals are those who have an account with an institution that provides a full suite of financial services and comes under some form of government regulation. Services include savings, money transfers, insurance or investment. Institutions that only offer loans to consumers, such as some MFIs, are not considered to be full-service institutions.

**Full-service nonbank financial institutions** – Nonbank financial institutions that offer their customers at least one of the following services: savings, money transfers, insurance, or investment.

**Grameen Progress out of Poverty Index (PPI)** – A poverty measurement tool from the Grameen Foundation wherein a set of country-specific questions are used to compute the likelihood that a household is living below the poverty line.

**Microfinance deposit-taking institutions (MDI)** – Financial services for poor and low-income clients offered by different types of service providers.

**Microfinance institution (MFI)** – An organization that offers financial services to low income populations. Almost all give loans to their members, and many offer insurance, deposit and other services.

**Mobile money (MM)** – A service in which a mobile phone is used to access financial services.

**Nonbank financial institution (NBFI)** – A financial organization that is not formally licensed as a bank or a mobile money provider, but whose activities are regulated, at least to some extent, by the central bank within the country. Such financial institutions include microfinance institutions (MFI), cooperatives, Post Office Banks and savings and credit cooperatives.

**Post Office (Savings) Bank** – A bank that offers savings and money transfers and has branches at local post offices.

**Savings and credit cooperative (SACCO)** – A unique member-driven, self-help group owned and managed by its members, who have a common bond. Its main purpose is to build up funds through regular contributions by each member, with the aim of providing affordable credit and collective investments for its members.

**Unregistered/over-the-counter (OTC) user** – An individual who has used DFS through someone else’s account, including a mobile money agent’s account or the account of a family member or a neighbor.

**Urban/rural** – Urban and rural persons are defined according to their residence in urban or rural areas as prescribed by the national bureau of statistics.
Country context

Positive developments in the marketplace, including new financial services products and changes in the regulatory environment, contributed to financial inclusion in Uganda, and may lead to more active use of digital accounts.

- **MoKash, a digital credit service** whose name was coined from the phrase “more cash,” launched in August 2016 as a result of a partnership between the Bank of Africa (CBA) and MTN Uganda. This is the first digital credit product to be offered in the Ugandan market. MoKash provides customers a suite of virtual banking products built on MTN’s mobile money platform, including the ability to save and borrow microloans from the CBA. This is a positive sign digital financial services (DFS) providers, as well as Uganda’s regulatory entities, realize the need to develop products and services that satisfy specific customer needs. Compared with Kenya and Tanzania, the limited products offered in Uganda, to date, have provided little incentive for customer uptake and continued use. The introduction of MoKash is recognition that if more Ugandans are going to be included in the digital ecosystem it will need to be strengthened through continued supply side innovations and a variety of product offerings (e.g., bill pay or a convenient way to pay school fees).

- **The Financial Institutions (Amendment) Act** was passed by the government in January 2016 and enacted into law. The amendments to the 2014 act provide for agent banking, Islamic banking, additional Credit Reference Bureaus, Bancassurance and reform of the Deposit Protection Fund. **Agency banking** is aimed at increasing access to formal financial services by allowing nonbank institutions to offer basic banking services to the unbanked. **Islamic banking** promises to offer interest-free financing under Shariah Law, and **Bancassurance** allows banks to offer customers insurance services and products. The latter three components give financial institutions greater latitude to not only offer more, but better and more convenient, services to clients, thus enhancing financial inclusion.

*https://www.mtn.co.ug/Mobile%20Money/Banking/Pages/MoKash.aspx

Notable statistics

• Uganda is building toward meaningful financial inclusion via increased access to mobile money services and growth in registered mobile money accounts.
  o Access to financial services continued to grow substantially, from 50 percent in 2015 to 55 percent in 2016, due to continued growth in the population that uses mobile money, which reached 53 percent.
  o The use of registered financial services accounts grew slightly from 2015 to 2016 due to growth in the use of registered mobile money accounts, which offset small decreases in the use of bank and NBFI accounts. Two in five Ugandan adults now have a registered financial account.
  o Thirty-three percent of Ugandans are active users of their registered financial accounts, compared to 32 percent in 2015. Active use among registered account holders, however, decreased over the past year.
  o Use of advanced functions beyond-basic-wallet services has increased from 14 percent in 2015 to 19 percent in 2016. Savings and bill pay remain the most common advanced activities, despite a decrease in bill pay use among active mobile money account holders (19 percent in 2015 to 16 percent in 2016). Payroll distribution via digital accounts is on the rise.

• Mobile money continues to be the predominant financial service in Uganda.
  o In 2016, the percentage of Ugandan adults who have a registered mobile money account increased to 38 percent, from 35 percent in 2015.
  o Fifteen percent access services over the counter (OTC) via somebody else’s account, including that of an agent. OTC use has been increasing since 2014, when 10 percent of Ugandans used OTC services.
  o Growth in mobile money usage has offset declines in the use of both banks and NBFI.
  o Consumers are more likely to know of a mobile money point-of-service vs. a bank or other regulated financial outlet. Awareness of the mobile money concept and providers is nearly universal.

*Financial inclusion is defined as individuals having accounts with institutions offering financial services beyond credit. Overlap representing those who have multiple kinds of financial accounts is not shown.

NBFIs were not included in the 2013 survey. Types of account ownership are not mutually exclusive. *A registered account used in the last 90 days.
FII Uganda Tracker Survey details

Survey Summary

- Annual, nationally representative survey (N=3,000) of Ugandan adults aged 15+
- Face-to-face interviews lasting, on average, 82 minutes
- Fourth survey (wave 4) conducted from July to August 2016
- Tracks trends and market developments in DFS based on the information gathered in the first survey, conducted in 2013, the second survey conducted in 2014, and the third survey in 2015

Data Collection

- Basic demographics and poverty measurement (Grameen Progress Out of Poverty Index). A new set of questions from the Grameen Foundation was used compared with previous years.
- Access/use of mobile devices
- Access/use of mobile money
- Access/use of formal financial services (e.g., bank accounts)
- Access/use of semi-formal and informal financial services (e.g., MDI, MFI, SACCO, cooperatives, self-help groups)
- Financial literacy and preparedness
- General financial behaviors

*In 2016, the FII questionnaire used a new set of questions from the Grameen Foundation to measure poverty indicators. As a result, 2016 data showed more Ugandans included in the “above the $2.50/day poverty line” category than in previous years.

Figures are weighted to reflect national census data demographics.

*Source: InterMedia Uganda FII Tracker survey Wave 4 (N=3,000, 15+) July-August 2016*
Four in 10 Ugandans are financially included, most of them have registered mobile money accounts

- 40% Financially included
- 4% Have a full-service NBFI account
- 9% Have a full-service bank account**
- 38% Have a registered mobile money account

To be considered financially included, individuals must have accounts with institutions offering financial services beyond credit. Some banks and many NBFI only offer credit services to their customers.

*Overlap representing those who have multiple kinds of financial accounts is not shown.
**Throughout this report, bank account holders have accounts at full-service institutions, unless otherwise noted.

There has been accelerated growth in access to financial services from 2014 to 2016; now more than half are using mobile money services.

Due to the changes in the questionnaire some data points may not be directly comparable across years. Obtaining airtime through mobile money is no longer considered an advanced activity.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
The largest gap in active financial account use is by poverty and place of residence; active use by women is 14 percentage points less than men.

2016: Active account usage by demographic
(Shown: Percentage of each subgroup)

- Above poverty line (n=1,680):
  - Active bank account holders: 14%
  - Active mobile money account holders: 52%
  - Active NBFI account holders: 5%
  - All active financial account holders: 54%

- Urban (n=810):
  - Active bank account holders: 16%
  - Active mobile money account holders: 53%
  - Active NBFI account holders: 4%
  - All active financial account holders: 55%

- Males (n=1,058):
  - Active bank account holders: 11%
  - Active mobile money account holders: 39%
  - Active NBFI account holders: 4%
  - All active financial account holders: 41%

- Total population (N=3,000):
  - Active bank account holders: 7%
  - Active mobile money account holders: 32%
  - Active NBFI account holders: 3%
  - All active financial account holders: 33%

- Females (n=1,942):
  - Active bank account holders: 4%
  - Active mobile money account holders: 25%
  - Active NBFI account holders: 2%
  - All active financial account holders: 27%

- Rural (n=2,190):
  - Active bank account holders: 4%
  - Active mobile money account holders: 25%
  - Active NBFI account holders: 3%
  - All active financial account holders: 27%

- Below poverty line (n=1,320):
  - Active bank account holders: 2%
  - Active mobile money account holders: 16%
  - Active NBFI account holders: 1%
  - All active financial account holders: 17%

Types of accounts are not mutually exclusive.

Three in four Ugandans live within a kilometer of a POS; half of consumers know of a mobile money agent within 1 kilometer of where they live.

**2016: Proximity to points-of-service (POS) for financial institutions**
(Shown: Percentage of Ugandan adults, N=3,000)

- **Any POS**: 75%
  - Less than 1 km from home: 12%
  - 1-5 km from home: 6%
  - More than 5 km from home: 6%
  - Don't know: 22%

- **MM agent**: 51%
  - Less than 1 km from home: 18%
  - 1-5 km from home: 14%
  - More than 5 km from home: 14%
  - Don't know: 22%

- **Retail store with an MM agent**: 35%
  - Less than 1 km from home: 9%
  - 1-5 km from home: 10%
  - More than 5 km from home: 15%
  - Don't know: 34%

- **Informal group**: 39%
  - Less than 1 km from home: 9
  - 1-5 km from home: 15
  - More than 5 km from home: 25
  - Don't know: 42

- **Banking agent**: 42%
  - Less than 1 km from home: 18
  - 1-5 km from home: 15
  - More than 5 km from home: 25
  - Don't know: 34

- **Bank branch**: 44%
  - Less than 1 km from home: 18
  - 1-5 km from home: 15
  - More than 5 km from home: 25
  - Don't know: 47

- **ATM**: 47%
  - Less than 1 km from home: 18
  - 1-5 km from home: 15
  - More than 5 km from home: 25
  - Don't know: 47

- **SACCO**: 51%
  - Less than 1 km from home: 10
  - 1-5 km from home: 15
  - More than 5 km from home: 23
  - Don't know: 51

- **MFI/MDI**: 54%
  - Less than 1 km from home: 10
  - 1-5 km from home: 6
  - More than 5 km from home: 13
  - Don't know: 27

Half of adults do not know of any SACCO or MFI/MDI nearby.

Conversion from awareness of mobile money providers* to mobile money use
(Shown: Percentage of Ugandan adults for each year)

Awareness has not changed significantly, but conversion rates for both registered and OTC use have steadily increased since 2014

2014 (N=3,001)
- 91% aware
- 47% use mobile money
- 33% registered users
- 10% OTC use

2015 (N=3,000)
- 91% aware
- 52% use mobile money
- 35% registered users
- 13% OTC use

2016 (N=3,000)
- 92% aware
- 58% use mobile money
- 38% registered users
- 15% OTC use

*Aware of at least one mobile money provider. **Percentages add up to 47% and 53% due to statistical rounding.

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
Half of Ugandan adults own mobile phones; only one in five phone owners completed the customer journey to monthly active use of advanced services.

2016: Distribution of Ugandan mobile phone owners at each major step in the customer journey for mobile money, and conversion rate between steps
(Shown: Percentage of Ugandan adults, N=3,000)

- Mobile phone ownership: 51%
- Trial/access*: 41%
- Registration*: 36%
- Active registered use (30 days)*: 31%
- Active registered use (90 days)*: 27%
- Advanced active registered use (30 days)*: 11%

*Phone owners

Source: InterMedia Uganda FII Tracker survey Wave 4 (N=3,000,15+), July-August 2016.
Mobile money account ownership and active use increased between 2015 and 2016 across most demographics*

**Demographic trends for all registered mobile money account use**
(Shown: Percentage of Ugandan adults who fall into each category**)

**Demographic trends for active registered mobile money account use**
(Shown: Percentage of Ugandan adults who fall into each category**)

*Disaggregation by above/below <$2.50 poverty line is not displayed because changes taken in 2016 to the index used to calculate the poverty line created incomparable data with previous years. **Categories are not mutually exclusive.

Due to the changes in the questionnaire some data points may not be directly comparable across years. Obtaining airtime through mobile money is no longer considered an advanced activity.

Question allowed for multiple responses.

Source: InterMedia Uganda FII Tracker surveys Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
Airtel Money’s* market share continued to increase vs. 2013; market leader MTN saw a decrease in the number of active account holders

Active mobile-money provider account holdings
(Shown: Percentage of active mobile money account holders who report using selected providers, by year)

- MTN Mobile Money
- Airtel Money
- M-Sente
- Safaricom M-PESA
- Africell Money/Orange Money

*Airtel Money merged with Warid Pesa in 2013. Active mobile money account holders can have accounts with more than one provider. Vodafone M-PESA & Ezee Money (not shown) had 0 percent market share.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
CICO and P2P transfers drive adoption and usage; a more inclusive digital ecosystem will require Ugandans to adopt additional services

Somebody requested I open an account

Question allowed for multiple responses.

Source: InterMedia Uganda FII Tracker survey Wave 4 (N=3,000, 15+), July-August 2016.
While, overall, advanced bank account activities remained static vs. 2015, saving increased and bill pay almost doubled during the same period.

66%

of active bank account holders have used at least one advanced banking feature

vs.

66% in 2015, 57% in 2014, and 47% in 2013

Due to the changes in the questionnaire some data points may not be directly comparable across years.

Question allowed for multiple responses.

Source: InterMedia Uganda FII Tracker surveys Wave 3 (N=3,000, 15+), July-August, 2015; Wave 4 (N=3,000, 15+), July-August 2016.
Bank use, including digital bank use, decreased vs. 2015; few Ugandans are using mobile/internet applications for bank activities

Digital bank account access and usage
(Shown: Percentage of Ugandan adults)

- Access to a bank account, digital: 11% in 2015, 10% in 2016
- Access to a bank account, all: 13% in 2015, 11% in 2016
- Registered bank account, digital: 9% in 2015, 9% in 2016
- Registered bank account, all: 11% in 2015, 9% in 2016
- Active bank account holders, digital: 7% in 2015, 9% in 2016
- Active bank account holders, all: 9% in 2015, 7% in 2016

Digital access among active bank account holders
(Shown: Percentage of active bank account holders)

- Digital bank account: 97% in 2015, 94% in 2016
- Offers debit/ATM or credit card: 96% in 2015, 92% in 2016
- Can be accessed via internet and/or mobile: 59% in 2015, 58% in 2016
- Can transfer money digitally: 65% in 2015, 56% in 2016

Digital bank accounts are those that offer at least one of the following options: debit/ATM or credit cards, internet or mobile access, or a digital money transfer capability.

Source: InterMedia Uganda FII Tracker survey Wave 4 (N=3,000, 15+), July-August 2016.
Full-service NBFIs serve a shrinking percentage of Ugandans; credit-only NBFIs showed slight gains from 2015

NBFIs were not included in the 2013 FII survey.

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
SACCOs are the most commonly used NBFI; nearly half of SACCO registered users are using their accounts to save.

2016: Nonbank financial institution usage
(Shown: Percentage of Ugandan adults, N=3,000)

2016: Use of SACCO accounts*
(Shown: Percentage of SACCO account holders)

*Subgroups of registered MFI/MDI, cooperative and Post Office Bank users are too small for further analysis.

A third of Ugandan adults have active digital stored-value accounts; mobile money usage continues to deepen

Digital stored-value accounts: accounts in which a monetary value is represented in a digital electronic format and can be retrieved/transferred by the account owner remotely. For this particular study, DSVAs include a bank account or NBFI account with digital access (a card, online access or a mobile phone application) and a mobile money account.

Source: InterMedia Uganda FII Tracker surveys; Wave 3 (N=3,000, 15+), July-August 2015; Wave 4 (N=3,000, 15+), July-August 2016.
