The Financial Inclusion Insights (FII) program responds to the need identified by multiple stakeholders for timely, demand-side data and practical insights into digital financial services (DFS), including mobile money, and the potential for their expanded use among the poor.

The FII team conducts regular survey and qualitative research in Kenya, Tanzania, Uganda, Nigeria, India, Pakistan, Bangladesh and Indonesia to:

• Track access to and demand for financial services generally, and the uptake and use of DFS specifically;
• Measure adoption and use of DFS among key target groups (females, BOP, rural, unbanked, etc.);
• Identify drivers and barriers to further adoption of DFS;
• Evaluate the agent experience and the performance of mobile money agents; and
• Produce actionable, forward-looking insights to support product and service development and delivery, based on rigorous FII data.

The FII program is managed by InterMedia. Visit the FII Resource Center to learn more: www.finclusion.org.

EXECUTIVE SUMMARY
UGANDA

Key findings – financial inclusion

• Uganda is building toward meaningful financial inclusion.
  o Formal account ownership and usage have grown versus 2013, largely due to increases in mobile money usage.
    o Almost four in 10 (39 percent) Ugandans now have a registered account, up from one-third (33 percent) in 2013
  o Active account ownership has also increased versus 2013.
    o Thirty-four percent of Ugandans are now active account holders (used their registered accounts “in the past 90 days”) versus 30 percent in 2013. There are few dormant bank and mobile money accounts. Most who have an account use it.
  o Active bank and mobile money account holders are using more beyond-basic-wallet functions compared with previous years. Savings and bill pay remain the most common advanced activities; payroll distribution and merchant payments via digital accounts are on the rise.
  o While mobile money active registered account usage largely explains the growth in financial inclusion, the use of bank services and account ownership declined from a relatively low market position.

Registered financial service users*
(Shown: Percentage of Ugandan adults for each year)

Active financial service users
(Shown: Percentage of Ugandan adults for each year)

*Overlap representing those who have multiple kinds of financial accounts is not shown.
Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
Mobile money continues to be the predominant financial service in Uganda.

- Thirty-five percent of Ugandan adults have a registered mobile money account. An additional 13 percent access services via somebody else’s account, including that of an agent (over-the-counter/OTC use).
- Mobile money account ownership surpasses the use of both banks and nonbank financial institutions (NBFIs).
- Consumers are more likely to know of mobile money point-of-service options versus banks or other regulated financial outlets.
- There is nearly universal knowledge of the mobile money concept and providers.
- There continues to be a sizable portion of the population that know about mobile money and do not use it.
  - 43% are considered “aware nonusers,” and they are primarily poor, rural and less educated.
  - The biggest barriers for aware nonusers include access to technology and lack of technical skills.

**Key findings – mobile money**

**2015: Registered users of financial services**

(Shown: Percentage of Ugandan adults, N=3,000)

- **35%** have a registered mobile money account
- **11%** have a bank account
- **6%** have a nonbank financial institution account

*Overlap representing those who have multiple kinds of financial accounts is not shown.

*Source: InterMedia Uganda FI Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.*
Key findings – mobile money

• Limited handset ownership continues to be a barrier to mobile money usage despite an increase in access.
  o Use of financial services accounts, especially mobile money accounts, is dependent on access to mobile phones and the ability to use them to send and receive texts.
  o Adults without access to mobile phones and those who borrow phones are both poor, female and living in the rural areas.

• Making a financial transaction is the most commonly used advanced phone function, followed by sending/receiving multi-media messages.
  o Those who are more likely to use their phones for advanced services are younger Ugandans and rural residents.

*Overlap representing those who have multiple kinds of financial accounts is not shown.

Source: InterMedia Uganda FII Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.
Implications for expanding mobile money usage

• Expanding mobile money usage in Uganda requires a dual focus: increasing access to affordable phones and encouraging phone owners to register their own SIM cards, and building meaningful knowledge about the benefits of mobile money use.
  • Limited ownership of a personal mobile phone and/or SIM card, coupled with a lack of understanding of how to start using mobile money, is the biggest obstacle keeping aware nonusers and nonregistered users from registering an account.
  • Building meaningful knowledge comes from connecting mobile money to the target audience’s daily realities. Aware nonusers of mobile money (aware of mobile money but do not use it) struggle with budgeting and have difficulties making ends meet. This leads them to believe they can’t afford or aren’t eligible to use mobile money. FII data, however, demonstrates those who have a financial account are likely to manage their money better. Therefore, it is important to illustrate for aware nonusers how their financial lives can change for the better with the use of mobile money.

• Promoting active, advanced use can deepen a user’s relationship with mobile money.
  • Current users of mobile money services show interest in expanding the application of their accounts beyond basic CICO and P2P functions. There is a notable increase in the number of mobile money account holders who used the service at least once in the past 90 days.
  • Usage of advanced services is also increasing with more users opting to save/set aside money and pay bills via their accounts. Other advanced uses are also picking up but at a slower pace. The increased use of advanced services might be because active users are now seeing more need of these services.
METHODOLOGY & RESEARCH DESCRIPTION
FII Uganda Tracker Survey details

Survey Summary

• Annual, nationally representative survey (N=3,000) of Ugandan adults aged 15+
• Face-to-face interviews lasting, on average, 66 minutes
• Third survey (wave 3) conducted from 7/1/2015 to 8/1/2015
• Tracks trends and market developments in DFS based on the information gathered in the first survey, conducted in 2013, and second survey conducted in 2014

Data Collection

• Basic demographics and poverty measurement (Grameen Progress Out of Poverty Index)
• Access/use of mobile devices
• Access/use of mobile money
• Access/use of formal financial services (e.g., bank accounts)
• Access/use of semi-formal and informal financial services (e.g., SACCO, cooperatives, self-help groups)
• Financial literacy and preparedness
• General financial behaviors

FINANCIAL INCLUSION

UGANDA
Understanding financial inclusion

<table>
<thead>
<tr>
<th>What is financial inclusion?</th>
</tr>
</thead>
<tbody>
<tr>
<td>For the purposes of this report, financial inclusion is defined as having an account with an institution that provides a full-suite of financial services and comes under some form of government regulation. These services include savings, money transfers, insurance or investment. Institutions that only offer loans to consumers, such as some microfinance institutions (MFIs), are not considered to be full-service institutions. <em>(Source: InterMedia FII Program)</em></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>How is it measured?</th>
</tr>
</thead>
<tbody>
<tr>
<td>To determine financial inclusion, we look at the percentage of adults who report having an account in their name with at least one institution offering a full-suite of financial services.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>What is included in this?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Banks, nonbank institutions and mobile money services are included in the financial inclusion measure. In the case of Uganda, nonbank financial institutions include MFIs, cooperatives, post office banks and SACCOs. In all countries, individuals must have an account in their own name.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>What isn’t included?</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excluded from the financial inclusion measure are money guards, savings collectors and digital recharge cards – such as gift cards – that are not attached to a bank or MFI account. Additionally, individuals who have accessed formal financial services but do not have their own account, such as those using another family member’s account, are not included.</td>
</tr>
</tbody>
</table>

Types of accounts are not mutually exclusive. *A registered account used in the last 90 days. **NBFI question was not asked in the FII 2013 survey.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+) June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
More active bank and mobile money account holders are using their accounts for advanced activities

**Bank uses, by type**
(Shown: Percentage of active bank account holders)

**Mobile money uses, by type**
(Shown: Percentage of active mobile money account holder)

Due to the changes in the questionnaire some data points may not be directly comparable across years.

*Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+) June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.*
There is more disparity within active account usage by poverty level than urbanicity and gender

2015: Active account usage by demographic
(Shown: Percentage of each subgroup)

- Above poverty line (n=964): 19% active bank, 57% mobile money, 8% NBFI, 62% total
- Urban (n=800): 18% active bank, 53% mobile money, 7% NBFI, 58% total
- Males (n=1,045): 13% active bank, 38% mobile money, 5% NBFI, 42% total
- Total population (N=3,000): 9% active bank, 31% mobile money, 5% NBFI, 34% total
- Females (n=1,955): 5% active bank, 25% mobile money, 5% NBFI, 28% total
- Rural (n=2,200): 6% active bank, 23% mobile money, 4% NBFI, 26% total
- Below poverty line (n=2,036): 5% active bank, 21% mobile money, 4% NBFI, 24% total

Types of accounts are not mutually exclusive.

Source: InterMedia Uganda FII Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.
Consumers know of an informal financial group or mobile money (MM) agent within 1 km of where they live; banks, ATMs are farther away

2015: Proximity to points-of-service (POS) for financial institutions
(Shown: Percentage of Ugandan adults, N=3,000)

- 54% know of any mobile money agent within 1 km of their home
- 16% know of any banking POS within 1 km of their home

More than half of those who know about a bank POS also know about an MM POS

Source: InterMedia Uganda FII Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.
MOBILE MONEY
(2013-2015)
Market context

**2009**
Mobile money services were first introduced in Uganda by MTN Mobile Money, Airtel Money and Uganda Telecom.

- Main use initially was for basic services. This included deposits and withdrawals, buying airtime and data bundles, and sending/receiving money from other mobile money users.

**2010-2014**
Bank of Uganda issued guidelines for MNO/bank partnerships and consumer protection (Mobile Money Guidelines, 2013), and started consumer literacy programs to promote financial inclusion.

Uganda Revenue Authority (URA) imposed a 10-percent tax on all money transfers including mobile money.

MTN Mobile Money and Airtel Money are the leading mobile money providers.

- Providers expanded the range of mobile money activities to provide value-added products and services.

**2015**
More mobile money providers have entered the marketplace, but MTN Mobile Money remains the market leader, followed by Airtel Money.

- Introduction of the National ID program helped increase mobile money subscribership.

Banks introduced mobile banking apps to allow customers access to bank accounts via mobile money.

The East African community now enjoys cross-border mobile money transfers.

Uganda still needs a comprehensive regulatory framework for mobile money.
Key measures: Mobile money awareness is static, usage grew incrementally since 2013

**Progression from awareness of mobile money providers* to use**  
(Shown: Percentage of Ugandan adults for each year)

*Identification documents (ID) necessary for registering a mobile money or a bank account include one of the following: a National ID, passport, voter’s card, driver’s license, school issued ID, ration card, military ID, birth certificate, company or government ID, taxpayer certificate or local council (LC) certificate.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
Mandatory SIM-card registration may have contributed to continued non-registered use

- Between 2012 and 2013, the Uganda Communications Commission started a national SIM-card registration exercise.

- Requirements for registration of new SIMs included presenting one of the required IDs and biometrics: a headshot and data from fingerprint and iris scans.

- Proxy registration was limited and restricted to direct family of persons seeking registration.

- Active SIM Cards that were not registered by the deadline were deactivated.
MOBILE MONEY: UNAWARE NONUSERS
Unaware nonusers are primarily lower-income, less educated Ugandans, and those in the West Nile and Eastern Region

Mobile money provider awareness*
(Shown: Percentage of Ugandan adults for each year)

2015 (N=3,000): 9% unaware
2014 (N=3001): 9% unaware
2013 (N=3,000): 10% unaware

### 2015: Percentage of each subgroup among people not aware of mobile money providers

</tbody>
</table>

*Awareness of at least one mobile money provider.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+) June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
MOBILE MONEY: AWARE NONUSERS
More than two in five Ugandans know about mobile money, but do not use it, making them “aware nonusers”

2015: Aware nonusers of mobile money
(Shown: Percentage of Ugandan adults, N=3,000)

2015: Profile of aware nonusers of mobile money
(Shown: Percentage of each subgroup)

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Aware nonusers primarily save and borrow; they typically don’t have financial accounts, insurance or investments

2015: Aware nonusers of mobile money
(Shown: Percentage of Ugandan adults N=3,000)

2015: Financial activities engagement
(Shown: Percentage of each category)

- Borrow 59%
- Save 70%
- Have insurance 2%
- Have investments 25%
- Have a bank account 3%
- Have an NBFI account 2%

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Aware nonusers budget their income and feel that they stay on budget

2015: Aware nonusers of mobile money
(Shown: Percentage of Ugandan adults, N=3,000)

43%, aware nonusers of mobile money

2015: Behavior responsiveness for aware nonusers
(Shown: Percentage of each subgroup)

87% budget income

13% do not budget income

98% stay on budget

2% do not stay on budget

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Even on budget, aware nonusers have difficulty making ends meet, find themselves in debt and pay their bills late.

2015: Aware nonusers of mobile money
(Shown: Percentage of Ugandan adults, N=3,000)

43%, aware nonusers of mobile money

2015: Behavior responsiveness for aware nonusers
(Shown: Percentage of each subgroup)

- Delay payments of bills: 82%
- Have more debts than savings: 78%
- Do not have enough food to eat: 48%
- Do not have an emergency fund: 79%

Spend more than earn: 62%

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Aware nonusers face challenges: access to technology and technical skills

Among aware nonusers:

- 81% have an ID*
- 77% have basic numeracy
- 39% have at least one active SIM card
- 36% have a mobile phone
- 33% ever send/receive text messages

Indirect agent-experience influence:
Frustrations users have with agents may make their way to nonusers. More than half of users found agents were absent, didn’t have enough cash or e-float, and either their system, or the GSM/mobile network, was down.

*Identification documents (ID) necessary for registering a mobile money or a bank account include one of the following: a National ID, passport, voter’s card, driver’s license, school issued ID, ration card, military ID, birth certificate, company or government ID, taxpayer certificate or local council (LC) certificate.

Source: InterMedia Uganda FII Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.
MOBILE MONEY: USER SEGMENTS
Mobile money users tend to actively utilize their registered accounts

2015: Usage of mobile money (MM) services
(Shown: Percentage of all Ugandan adults, N=3,000)

- Registered MM users (n=1,036)
- Unregistered MM users (n=375)
- MM nonusers (n=1,607)

88% of users access their accounts at least once every three months

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Unregistered mobile money users are more likely than registered users to be females and to have a primary education or lower

2015: Demographic characteristics of registered and unregistered mobile money (MM) users
(Shown: Percentage of each subgroup)

UGANDA

BANK SERVICES
(2013-2015)
Market context: Bank services overview

The Bank of Uganda (BoU) regulates the activities of formal banks and nonbank financial institutions (NBFI). Uganda has:
- 25 commercial banks
- 4 credit institutions
- 4 microfinance deposit-taking institutions*

Key regulations of the banking sector include:
- Maya Declaration** (discussed in the FII Wave 2 report, link below).

*https://www.bou.or.ug/bou/supervision/financial_institutions.html

The main mobile money services in Uganda involve partnerships between commercial banks and mobile phone operators. Banks are using these partnerships to roll out mobile banking products (e.g., Centenary Bank & MTN partnered on a mobile money ATM cash-out service. Centenary Bank ATMs across the country can be used by MTN mobile money customers to cash out).

Under these partnership, the mobile phone company employs a network of agents to interface with their customers. Customers are able to purchase, with cash, virtual money from agents.

Virtual money can be stored electronically in the customer's virtual account; transferred to another mobile money customer; used to pay utility bills and school fees; and can, at a later date, be withdrawn in cash through an agent.
2013-2015 progress at a glance: Access, registered and active bank use were static over the past three years

Financial account access
(Shown: Percentage of Ugandan adults for each year)

- 2013: 12% Bank, 15% Registered
- 2014: 14% Bank, 14% Registered
- 2015: 15% Bank, 12% Registered

Registered financial service users
(Shown: Percentage of Ugandan adults for each year)

- 2013: 12% Bank, 14% Active
- 2014: 14% Bank, 12% Active
- 2015: 14% Bank, 11% Active

Active* registered financial service users

- 2013: 10% Bank
- 2014: 11% Bank
- 2015: 9% Bank

Types of account ownership are not mutually exclusive. *Used account in last 90 days.

Source: InterMedia Uganda FII Tracker surveys Wave 1 (N=3,000, 15+), September-December 2013; Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
Use of bank services and account ownership declined from a relatively low market position

Perceived lack of money is the key barrier to getting a bank account, mostly reported among the rural groups and poor.

**Top three reasons for not having a bank account**
(Shown: Percentage of Ugandan adults, by year)

- I don't have money: 50% (Rural), 45% (Urban)
- I don't have money to make any transactions with such account:
  - Rural females: 11%
  - Urban females: 13%
- There are no banks close to where I live:
  - Rural: 5%
  - Urban: 4%

**2015: Those who say they don’t have money to open a bank account**
(Shown: Percentage of each category, n=1,498)

- Rural: 54%
- Urban: 39%
- Gainfully employed: 49%
- Rural females: 58%
- Rural males: 50%
- Unemployed: 53%
- Urban females: 46%
- Urban males: 30%
- Have ID: 50%
- Below poverty line: 56%
- Above poverty line: 35%
- Don’t have ID: 53%

*Identification documents (ID) necessary for registering a mobile money or a bank account include one of the following: a National ID, passport, voter’s card, driver’s license, school issued ID, ration card, military ID, birth certificate, company or government ID, taxpayer certificate or local council (LC) certificate.

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
Those who do not have a bank account still partake in financial activities; a third of them have an alternative financial account

2015: Ugandans without a full service bank account
(Shown: Percentage of those who do not have a bank account, n=2,692)

- Borrow: 60%
- Save: 71%
- Have insurance: 3%
- Have investments: 29%
- Have a mobile money account: 29%
- Have an NBFI account: 4%

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
A majority of those who don’t have a bank account budget their money and adhere to their budgets.

**2015: Responsible behavior of Ugandans without a full service bank account**

(Shown: Percentage of Ugandans without a bank account, n=2,692)

- 89%, don’t have a full service bank account
- 87% budget income
- 2% do not stay on budget
- 98% stay on budget

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
NONBANK FINANCIAL SERVICES
(2014-2015)
2014-2015 progress at a glance: Nonbank financial institutions play a relatively minor role in expanding financial inclusion in Uganda

Financial account access

Registered financial service users
(Shown: Percentage of Ugandan adults for each year)

Active financial service users

NBFI question was not asked in the FII 2013 survey.

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
SACCO is the more common NBFI; usage is static versus 2014

Financial institution registration and use, by year
(Shown: Percentage of NBFI account holders among the total population, by year)

<table>
<thead>
<tr>

</tbody>
</table>

*Savings and credit cooperative

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
NBFIs continue to have more of a savings function in the marketplace

**Use of nonbank financial institution accounts**
(Shown: Percentage of account holders for each institution)

2014

- **Save/set aside money**
  - MFI (n=40): 78%
  - SACCO (n=112): 91%

- **Loan activities**
  - MFI (n=40): 41%
  - SACCO (n=112): 76%

2015

- **Loan activities**
  - MFI (n=43): 53%
  - SACCO (n=95): 45%

- **Save/set aside money**
  - MFI (n=43): 54%
  - SACCO (n=95): 36%

Decline in the use of SACCOs for loan activities might be due to more appealing alternative credit products.

*Subgroups of registered cooperative and post office bank users are too small for further analysis.

Source: InterMedia Uganda FII Tracker surveys Wave 2 (N=3,001, 15+), June-July 2014; Wave 3 (N=3,000, 15+), July-August 2015.
INTEGRATION OF MOBILE MONEY AND BANK SERVICES (2015)
Few Ugandans use both bank and mobile money, most tend to use one of the financial institutions exclusively

<table>
<thead>
<tr>
<th>2015: Percentage of Ugandans who use either a bank or mobile money, or both (N=3,000)</th>

</tbody>
</table>

Figures are weighted to reflect national census data demographics. Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
There are signs that some Ugandan financial services users see value in using both banking and mobile money as complementary services.

2015: Adults by different categories of access and use of bank and mobile money
(Shown: Percentage of Ugandan adults, N=3,000)

- Active bank or mobile money: 33%
- Active bank and mobile money: 7%
- Unregistered bank or mobile money: 13%
- Unregistered bank and mobile money: 0.1%
- Registered bank or mobile money: 37%
- Registered bank and mobile money: 9%
- Access bank or mobile money: 49%
- Access bank and mobile money: 11%

Figures are weighted to reflect national census data demographics.

Source: InterMedia Uganda FII Tracker survey (N=3,000, 15+), July-August 2015.
Two-thirds of those who access mobile money and banks are active registered users

2015: Progression from access to active registered use of banks or mobile money (MM)
(Shown: Percentage of Ugandan adults, N=3,000)

Access bank and MM  |  Registered bank and MM  |  Active bank and MM
11%                  | 9%                       | 7%

Males, urbanites and those above the poverty line are more likely to actively use both bank and mobile money.

Source: InterMedia Uganda FII Tracker survey Wave 3 (N=3,000, 15+), July-August 2015.
Bank account users, including registered and active users, who use banks exclusively, are financially more active

GLOSSARY

• **Access** – Access to a bank, NBFI or mobile money account; those with access have used the services either via their own account or via the account of another person.

• **Accumulating Savings and Credit Association (ASCA)** – Also called Village Savings and Loan Associations (VSLAs), usually comprise 10 to 20 participants who conduct savings and loan activities for a fixed period, usually 12 months.

• **Active account holder** – An individual who has a registered financial services account and has used it in the last 90 days.

• **Advanced use** – The use of an account for services other than basic or P2P services. (For the purposes of this study, in the case of mobile money, airtime top-ups are not considered an advanced use.)

• **Basic use** – The use of an account to cash-in (deposit) or cash-out (withdraw), or conduct account maintenance.

• **Below the poverty line** - In this particular study, adults living on less than $2.50 per day, as classified by the Grameen PPI.

• **Cooperative** – Typically, a business or other professional organization that is owned and run jointly by its members, who share the profits or benefits. Cooperatives can release some of the profits/funds as loans to its members.

• **Credit-only financial institution** – A financial institution that only disperses loans to its customers.

• **DFS access** – Access to a DFS account through one’s own account or someone else’s account.

• **Digital financial services (DFS)** – Financial services that are provided through an electronic platform (mobile phones, electronic cards, the internet, etc.).

• **Financial inclusion** – For the purposes of this report, financial inclusion is defined as having an account with an institution that provides a full suite of financial services and comes under some form of government regulation. Services include: savings, money transfers, insurance or investment.

• **Full-service financial institution** – Financial institutions that offer its customers at least one of the following services: savings, money transfers, insurance or investment.

• **Grameen Progress out of Poverty Index (PPI)** – A poverty measurement tool from the Grameen Foundation wherein a set of country-specific questions are used to compute the likelihood that a household is living below the poverty line.

• **Informal financial institutions** – Financial institutions or services that do not offer accounts or a full suite of services. These vary from highly informal services such as money guards (individuals who keep money for others) to established community savings groups or collectives.
GLOSSARY

• **Microfinance institution (MFI)** – An organization that offers financial services to low-income populations. Almost all give loans to their members, and many offer insurance, deposit and other services.

• **Mobile money (MM)** – A service in which a mobile phone is used to access financial services.

• **Nonbank financial institution (NBFI)** – A financial organization that is not formally licensed as a bank or a mobile money provider, but whose activities are regulated, at least to some extent, by the central bank within the respective country. Such financial institutions include microfinance institutions (MFI), cooperatives, post office Savings Banks and village-level, semi-formal savings groups.

• **P2P transaction** – The use of an account to send or receive money to or from other individuals.

• **Post office (Savings) Bank** – A government-run bank that operates through local post offices.

• **Registered account holder** – An individual who has a full-service bank, NBFI or mobile money account in their own name that offers more than just credit services.

• **Rotating savings and credit association (ROSCA)** – A group of individuals who agree to meet for a defined period in order to save and borrow together, a form of combined peer-to-peer banking and peer-to-peer lending.

• **Savings and credit cooperative (SACCO)** – A unique member driven, self-help group, which is owned and managed by its members who have a common bond (e.g., work for the same employer, belong to the same church, live in the same village, etc.). All members contribute to the SACCO fund, which can be used for group investment or, part of which can be given to members as loans.

• **Unregistered/OTC user** – An individual who has ever used bank, NBFI or mobile money services through someone else’s account, including a mobile money agent’s account or the account of a family member or neighbor.

• **Urban/rural** – Urban and rural persons are defined according to their residence in urban or rural areas as prescribed by the national bureau of statistics.

• **Village level semi-formal savings group** – a savings group, often tied to initial or ongoing support from an NGO, that requires members to regularly contribute to a group-managed savings fund and disburses loans based on pre-determined requirements and loan terms.
